Summary

4th-year Software Engineering student with a strong foundation in software development, system architecture, and performance optimization. Experienced in building robust backend services, scalable web applications, and data-driven systems with a focus on reliability and clean code principles.

Work Experience

VISTA Lab September 2026 - Present

Developing a deep learning model to predict optimal finger positioning for classical piano scores, focusing on data preprocessing, feature extraction, and neural network pipelines.

TEİAŞ July 2026 - August 2026

Developed and maintained internal mission-critical web applications using Java and Angular, contributing to backend RESTful API design, secure database integration, and modular frontend interface components for institutional operations.

TeamSec July 2025 - January 2026

Engineered robust backend services and interactive operational dashboards using FastAPI and Streamlit. Migrated legacy systems to a modern React stack, performed structured data analysis via Power BI, and wrote optimized SQL queries alongside database indexing to enhance PostgreSQL execution performance and system reliability.

Projects

Game Development & AI (MağaraJam) GitHub

Developed a game prototype using Unity & C#; implemented complex AI agents utilizing a wide range of search, pathfinding, and optimization algorithms.

YatDice *Personal Project*

Designed and developed an interactive dice game application from scratch using C#, implementing clean object-oriented architecture, randomized mechanics, structured state management, and robust user interaction.

Air Quality Prediction *University Project*

Built a predictive machine learning model utilizing Python to analyze environmental datasets, perform exploratory data analysis, and execute complete data science workflows.

Certificates

May 2026 **Certificate of Achievement - HEALTH-AI Project** (Erasmus+ / European Union Funded)

Education

2023 - present Software Engineering at **Çankaya University**

2017 - 2021 Music/Piano at **Süleymanpaşa Municipality Conservatory**

2019 - 2023 High School at **Namık Kemal Anadolu Lisesi**

Skills

Programming	Python, Java, C/C++, C#, JavaScript, SQL, HTML/CSS
Frameworks	PyTorch, Spring Boot, React.js, FastAPI, Streamlit
Tools	PostgreSQL, Docker, Git, Power BI, Unity
Concepts	Machine Learning, System Architecture, OOP, Data Structures
